

Table1. The scoring table of Comprehensive Visual Rating Scale (CVRS)

Brain Atrophy Scales						
	0	1	2	3	4	Score
Hippo campus (T1WI)						Rt
						Lt (/8)
Axial images are to be rated unless coronal images are available						Rt
						Lt (/8)
		0 (normal)	1 (minimal)	2 (moderate)	3 (severe)	Score
Cortical atrophy (T1WI)	F					
	T					
	Pa					(/9)

Other finding	
T1WI, T1-weighted images; FLAIR, fluid-attenuated inversion recovery; Rt, right; Lt, left; F, frontal lobe; T, temporal lobe; Pa, parietal lobe; A, anterior horn; Po, posterior horn; WMH, white matter hyperintensity; D, deep; P, periventricular; The brain regions that would be focused in rating are marked by red rectangles to support fast rating.
